

Tab/solder connector block

401-LFPA-4,8/6,3

The combined tab/solder connector blocks are used primarily as connectors, cable splitter or as a base in electrical appliances and in automotive.

In the -LF version of the Type 401 a solder connection is located on the opposite side of the flat plug. The solder tags protrude approximately 8,5 mm from the housing. On the solder tag a flat plug sleeve B 2.8 x 0.8 can be inserted.

Depending on the application, this type is available with flat connectors 4,8 mm or 6,3 mm width in 1 to 12 pole design.

The insulation on the plug side can be done with our insulating ISO 187 on the tab 4,8 mm and ISO 110 with the solder joints. The tab connectors are suitable for flat plugs according to DIN 46247.

Options / Accessories

- Consecutive numbering
- Special marking according to drawing
- Insulating sleeves ISO-110 for solder points and ISO-187 for receptacles
- Other tab connector variants available upon request, e.g. for the transition from 4.8 to 6.3
