

PCB Connector Series 930

930-THR(-DS)

Screw connection

PCB Layout

L1 = (No. of poles - 1) x pitch
 Solder paste thickness: 0,15 - 0,2 mm
 Solder pad diameter: \varnothing 2,1 mm

The products based on our established 930 series have been designed for the soldering process in Through-Hole-Reflow technology. The soldering paste is applied to the plated through holes and the pins are placed in the circuit board and soldered by a reflow oven. The terminal mouldings are made of heat-resistant material. The stand-offs on the base ensures there is enough room for the soldering paste and facilitates good heat circulation for optimum soldering and enables the soldering joint to be visually inspected.

The solder pin projects very slightly with a circuit board thickness of 1,6 mm and creates a solder point on both sides and thus guarantees a secure mounting. The position of the solder pins enables an equally minimal allocation area on the circuit board as with wave soldering.
