

960-T(-DS)

PCB connector

Screw connection, interlocking

The PCB connector 960-T with a pitch of 5,08 mm is available in 2 and 3 poles and can be mounted side-by-side without pole loss. Compared to the smaller PCB connector 940-T, it has a larger clamping range and larger clearance and creepage distances.

Lateral latching elements on the housing allow to latch the PCB connector to longer terminal strips without pole loss.

Wire protection in DS-design reliably prevents damage to stranded wires by the screw.

The screws are secured against self-loosening.

For the grid connection, these PCB connectors are equipped with a M3 thread.
