

971-THM(-DS)

PCB connector

Screw connection, wire entrance vertical to PCB, interlocking, extended insertion length, with test holes

The PCB screw connector 971-THM with test hole and a pitch of 5 mm is available in 2- and 3-pole design. Welding the solder pin on top of the socket bore expands the insertion length to series 970 socket depth and allows to use extra-long solder pins.

The wire protector of the "DS"-version reliably prevents damage to multi-wire flexible conductors by the turning screw. The wire entrance is vertical to the PCB.

The screws are secured against self-loosening. For the connection to the grid, these PCB connectors are equipped with a M3 thread.

Lateral latching elements on the housing allow to latch the PCB connector to longer terminal strips without pole loss.
