

971-TX..(-DS)

PCB connector

Screw connection, wire entrance vertical to PCB, 2 to 4 screw connections at only one pole, interlocking

971-TX2-DS/01

971-TX3-DS/01

971-TX4-DS/01

The PCB screw connector 971-TX with a „pitch“ of 5 mm has 2 to 4 screw connections at only one pole and can be used e.g. as potential distributors. This allows to loop through earth conductors easily.

Lateral latching elements allow to latch this type of screw connector to terminal strips of any length.

Wire protection in DS-design reliably prevents damage to stranded wires by the screw.

The wire entrance is vertical to the PCB.

A not latchable version with 2 to 12 screw connections at one pole is available as type 971-X..

NOTE:

The pole numbers indicated in the article number do not designate the actual number of poles but the number of screw connections instead!

Options / Accessories

- Consecutive numbering
- Special marking according to drawing
- Self-adhesive marking strip BST-5,00
- Other solder pin lengths on request
- Solder pins with different lengths between each other
- Other position of solder pins
- Version with extended wire entrance
