

## 983-D/..-DAM

PCB connector

Screw connection, reinforced side walls, 2 solder pins per pole

 **RoHS**  
COMPLIANT

The PCB connector 983-D/..-DAM is based on the well proven terminals of the series 983.

The optimized geometry and slightly modified housing offer some advantages compared to the standard versions:

- The reinforced side walls can equalize the resulting torque to the outside. As a result, the reinforced side avoid the stacking without pole loss as given in the standard version.
- The housing geometry creates the possibility to implement central soldering pins.

The connection is designed as head contact, screw and washers forming a combination.

This terminal is available from 2 to 6 poles as well as a version with only one soldering pin (see 983-S/..-DAM).
