

983-F

Tab/screw connector blocks
with tabs 4,8 or screw connection

Tab/screw connector block 983-F in 10 mm pitch is based on our proven 98.. series.

It features a 4.8 mm tab connector in star-shaped arrangement and is available in 2- to 24-pole design for a maximum of six tab connectors or alternatively one screw connector per pole.

The compartments on both extremities of the block can serve for mounting on a substrate. Upon request, other compartments can remain empty for mounting purposes.

Installation note:

Since the bottom is not closed, the connector should be mounted on an isolating substrate/surface. Alternatively, our marking strip BST-983-F can be used for this purpose.

Due to the large variety of different types, listing numbers and prices of the various articles is not possible. When inquiring or ordering products with uniform assembly, stating the number of poles and the assembly number is sufficient. For mixed assemblies, we require an exemplary scheme including the orientation of asymmetrical assemblies, stating the number of desired poles and the assembly of each pole with assembly number.
