## REASON FOR MODIFICATION

Depending on their position on the part, it is possible that pick discs of  $\varnothing$  8 mm for parts listed below glue to the sides of the carrier tape pocket which can cause blockages when picking the part prior to the placement process. Using the smaller pick disk with  $\varnothing$  6 mm avoids this adverse effect.

## CUSTOMER INFORMATION

The part price remains unaffected by this modification.

## DATE OF MODIFICATION

The change to pick discs with  $\varnothing$  6 mm will be done  
**on beginning of August 2015**
